

## • Records Management

Worked with Yarmouth MA on their TriTech IMC system to handle 911 Dispatch and Records Management data analytics. Helped them with ETL and stored procedures for BI

## • Utility Billing

Paulding county GA utilized our services to integrate Tyler Munis ERP and Paymentus billing system to deliver accurate Water bills to residents implementing a local county law

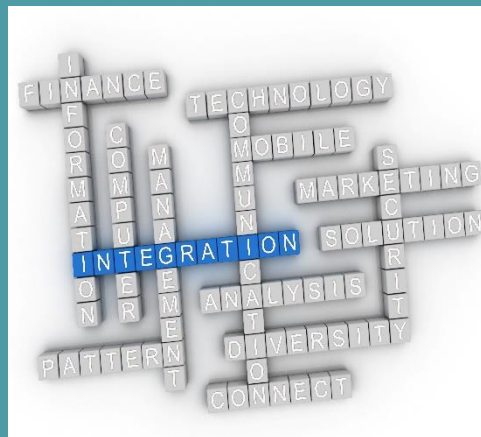

## • Property Appraisal

Built a Mobile app / Web Services layer on the WinGAP software for a GA county to help appraisers take notes, pictures during their visits and sync back to Enterprise

## • Single View / CMDB

Developed a web console to provide a single view of physical assets for a school system in SC derived from multiple data sources saving 800 hours of search time yearly and valuable budget dollars

Local Government agencies depend on vendors a lot during Data export, ETL, BI and for Integration needs. Sometimes legacy products lack API or Web Services layer that makes life difficult for IT leaders. Sonline has partnered with several customers to perform integration work in systems like Tyler Munis, WinGAP, Tritech RMS, ArcGIS, Salesforce, Paymentus, etc.

"We have used Sonline for several projects over the years. It is great to work with a partner that completes projects on time and budget, as well as recommending value additions along the way. Sonline resources are always professional, respectful and willing to work to satisfy customer goals"

Will Lyons, Technology Director  
Paulding County GA
