

Solution Snapshot

- STUDENT REGISTRATION**
 Parents and mentors from various GA schools can register students online from anywhere using any device
- METADATA MANAGEMENT**
 Program administrators can easily configure the application and adapt it to their needs
- ROLE BASED PORTAL**
 School district administrators, Regional admins, Parents experience their own views based on their rights & preferences
- TECHNOLOGY STACK**
 Node JS, HTML5, Angular, MySQL

GaSTC is a statewide technology competition where students in grades 3-12 compete in a variety of technology categories like graphics, system design, animation and robotics . Sonline built the AWS cloud solution that enables students from more than 1000+ schools to leverage the registration portal

Project Id : 34
Project Category : 3D Modeling
Grade Group : 03-04

| Advisor name | Julie Miller |
| Advisor email | jmiller@gmail.com |

Project Information

| | |
|--------------------|-------------------------------------|
| Purpose of project | To simulate the new campus building |
| Software used | Python |

"Sonline helped us create the GaSTC registration system. The change from our old system to the new system is amazing. It is so easy to use, and the feedback is excellent from parents & teachers"

Aaron Griffin, Board Member
