Cyber Security Checklist

13 Steps to Stay secure & strong from Zero-Day!!

- ☐ Identify and segregate public facing critical Assets (System, Network & Data)
- ☐ Review BC / DR Plans and align it with critical parameters (RTO, RPO and MTO)
- ☐ Write down Incident Response Plan (IRP) and create your Incident Response Team (IRT)
- ☐ Have a good backup strategy (3-2-1) and Test… Test.. Test… (Do a Simulation)
- ☐ Improve visibility over threats (Intrusion Detection System / Intrusion Prevention System)
- ☐ Adopt a strong BYOD policy and manage MDM solution
- ☐ Review your Cyber Security Insurance (include ransomware protection)
- ☐ Roll out Enterprise wide Cyber Security Awareness Program (Top down / Job Profile)
- ☐ Deploy reliable Anti-virus and additional end-point security (Detection & Response)
- ☐ Install advanced and sophisticated email security solution with AI
- ☐ Deploy O/S, Application and Security updates
- ☐ Implement strong Access Control Policy / Identity & Access Management
- ☐ Promote Security policies and evangelize for adoption across the Enterprise
